FROM ADOPTION TO ADVANTAGE IN ENTERPRISE AI

December 09, 2026
5:30 PM-9:00 PM
Eastern Time

Most enterprises have moved past the question of whether to adopt AI. The harder question now is how to turn it into lasting competitive advantage. This executive dinner brings together leaders from media, entertainment, banking, financial services, and insurance to look at how AI is reshaping business models, audience and customer engagement, and the way organizations grow. Over good food and great company, they will share the decisions, tradeoffs, and priorities that will set tomorrow's industry leaders apart in an economy increasingly powered by AI.
