Virtual Health Summit - Midwest & TOLA

Virtual Health Summit

SPEAKERS

Thomas McGinn MD MPH

Executive Vice President, Physician Enterprise

CommonSpirit Health

Anthony Perry

Vice President Ambulatory Transformation
Rush University Medical Center

Iris Berman

Vice President of Telehealth Services
Northwell Health

Adam Darvish

Senior Vice President Health System Development
Kindred

Roberta Schwartz

Chief Innovation Officer
Houston Methodist Healthcare System

Cara Veale

CEO
Indiana Rural Health Association

Kevin Ban

Chief Medical Officer
Walgreens

VJ Viswanathan

CEO
Torque

Adrin Mammen

Associate Vice President Patient Access Transformation
Montefiore Health System

Sarah Pletcher

Vice President and Executive Medical Director Virtual Care
Houston Methodist Healthcare System

Melissa Jordan

Director Quality & Telehealth, Post-Acute Division
Advocate Aurora Health System

Brian Skow MD

Chief Medical Officer
Avera Health

Chad Craig
RVP Medical Affairs
& System Hospital
Medicine Director
Marshfield Clinic

University

Healthcare leadership needs to exhibit adaptability and resilience, especially during times of disruption. Being forced to make extremely fast decisions with high levels of uncertainty requires the latest knowledge within the industry's latest technologies.

The C-Vision program team carefully researches the issues facing healthcare leadership with our panels of industry advisors and brings to you impactful programs that provide real world strategies and solutions that can have meaningful impact in the short and long term.

Impacts of Virtual Health on Patient Centric Care

Telemedicine is rapidly evolving. Issues with regulation and reimbursement have prevented its full immersion into the healthcare system. During the current pandemic, the Centers for Medicare and Medicaid Services expanded access to telemedicine services. The advantages of telemedicine suggest its cost-effectiveness, ability to extend access to specialty services, and its potential to help mitigate the looming physician shortage. Disadvantages seemingly include lack of available technological resources in certain parts of the country, issues with security of patient data, and challenges in performing the traditional patient examination. Let's explore.

Shaping a Virtual Health Strategy

Virtual Health offers an opportunity for healthcare providers to improve the value for their patients, communities, and regions. As providers continue to innovate how care is provided they are seeing the measurable impact virtual health can make by leveraging technology to connect with patients in new ways. Let's consider key drivers, scope of services, and methods of delivery.

CHAIR

Iris Berman

Vice President of
Telehealth Services
Northwell Health

PANELISTS

Anthony Perry

Vice President
Ambulatory
Transformation
Rush University
Medical Center

Adam Darvish

Senior Vice
President Health
System

Association

**Brian Skow
MD**

Chief Medical
Officer
Avera Health

FIRESIDE CHAT

10:35 AM-11:30 AM

Patient Centric Care and the Future of Pharmacy

Healthcare is creating more opportunities for patients to receive remote treatment options whether from their home or from long-term care or senior living residence. An increasingly important component of treatment planning is prescription services. How do the internal or external services provided by the pharmacy mirror the patient-centric care models the healthcare provider has developed? A patient's experience with the pharmacy of the future will be a true omnichannel experience. In fact, their experience won't start with walking in the door, it may start on their couch when they use a mobile device to contact their pharmacy.

VISION VOICES

11:35 AM-12:05 PM

Improving Quality of Care and Creating Financial Efficiencies

With new technologies boosted by electronic medical records and patient data management systems, data science, and analytic tools, massive amounts of data can be screened in seconds. Thus providing insightful information. How can we more effectively use the information in virtual health to make decisions and manage resources including the optimization of workflow, reducing unnecessary variation, and more effectively, managing workflow?

SPEAKER

Virtual Health 2021 Debunking The Myths

Prior to the Covid-19 pandemic, policymakers and leaders from both the health care delivery side and also the payer side were busy “reimagining” health care; but change was slow to occur because the economic incentives were not aligned with the vision. Covid-19 changed everything. Suddenly it's time to maneuver past reimagining and begin recreating. Let's consider the perceived impediments that led to the slow adoption of telemedicine, the changes that came with the Covid-19 pandemic, and advice on how to most easily implement a telemedicine program rapidly.

SPEAKER

**Judd
Hollander**

Senior Vice
President of
Healthcare Delivery

Thomas Jefferson
University

What are the Keys to Effective Use of People, Processes & Technologies?

Innovation is the result of successful people, processes, and technology changes that enable a new level of productivity and performance. What are the disruptors that have impacted virtual health, and how healthcare organizations across the continuum achieve the right combination of people, processes, and technology?

CHAIR

Adrin Mammen
