THE WIDENING GAP: WHAT THE COMPANIES COMPOUNDING ON AI BUILT FIRST

October 14, 2026
5:30 PM-9:00 PM
Pacific Time

Everyone started with the same models around the same time, and the spread between companies is now enormous. The difference came from what got built around them and the mindset that teams adopted.
Join a select group of executives as we get into what the companies pulling ahead put in place early: adoption that reached beyond one strong team, the token economics that let usage grow without a surprise, evaluation and audit design that hold in a regulated business, and the shared infrastructure that decides whether new department adoption takes six weeks or six months.
