AGENTIC AI: FROM EXPERIMENTATION TO OPERATIONAL REALITY

August 26, 2026
5:30 PM-9:00 PM
Pacific Time

Join us for an executive roundtable bringing together engineering and technology leaders to discuss the realities of deploying Agentic AI in enterprise/business environments. This session will explore what's working today, where organizations are encountering challenges, and how teams are navigating the complexities of scaling AI systems responsibly and effectively.
Together with industry practitioners and guest speakers actively leading AI initiatives, we'll examine key topics including AI adoption strategies, operational challenges, governance, and the growing importance of Agentic Observability. Attendees will gain practical insights, fresh perspectives from peers facing similar challenges, and actionable takeaways for advancing enterprise AI initiatives with greater confidence and measurable impact.
