BROWSER SECURITY FOR HUMANS AND AGENTS

July 16, 2026
6:00 PM-9:30 PM
United Kingdom Time

The enterprise workspace has reached a tipping point. Nearly all work—both human and automated—now happens within the browser. As organizations race to deploy AI agents to augment their workforce, they are discovering a "Security Gap": these agents operate at a speed and scale that bypasses traditional human guardrails, often struggling to access data safely due to a lack of APIs.
Join security leaders for an exclusive, peer-to-peer roundtable. We will deconstruct the new reality of the "Agentic Workforce" and explore how to modernize your security stack without increasing operational complexity.
