In the post pandemic era, hybrid working is the new status quo. Organisations have implemented and improved the digital workplace by providing productivity tools and accessibility to company resources which may now exist outside the traditional perimeter. In this session, we will share what makes a successful digital workplace, with a focus on how to deal with the inherent security risks of expanded accessibility to company resources. In this session you will learn from real working examples the keys to implementing a successful digital workplace including how to evaluate the potential ROI from the different security strategies available.
