FROM LEGACY TO LEADING EDGE: HOW AI IS POWERING ENTERPRISE MODERNISATION

October 15, 2025
6:00 PM-9:30 PM
Central European Time

Artificial Intelligence is rapidly becoming the catalyst for enterprise transformation. Advances in generative AI and agentic AI are enabling organizations to accelerate modernization, not as a one-time initiative, but as an ongoing capability to respond to change with speed and intelligence. By placing AI at the centre, enterprises can move beyond legacy limitations, streamline operations, and unlock new opportunities for innovation and growth. This roundtable will bring together industry and technology thought leaders to explore how AI is driving modernization journeys across industries. The discussion will highlight practical applications of GenAI and agentic AI in reimagining processes, enhancing decision-making, and delivering measurable outcomes. Through customer examples and peer-to-peer dialogue, participants will gain insights into how enterprises are using AI-driven modernization as the foundation to become adaptive, resilient, and future-ready in a constantly evolving business landscape.
