C VISION INTERNATIONAL

AGENDA

Defining A Good AI Pilot and Knowing When to Walk Away

Virtual Council

SPEAKERS

Shiva Rajagopalan
Sr. Director, Infrastructure & Security
GE Healthcare

Samantha Azzarello
MD, Head of Content Strategy
JP Morgan Chase

Kiran Adimatyam
Head of Emerging Technology
Citibank

Santosh Kumar Yamsani
Global Head of Enterprise Core & Platform Engineering
Global Financial Institution

Milind Buddhikot
CTO, North America Markets (NAM), Enterprise Campus Edge (ECE) Solutions
Nokia

Srikarthick Vijayakumar
Sr. Exec. Director, Platform Engineering & Site Reliability Engineering
JP Morgan Chase

Neerja Wadhwa
VP, Credit Models & Data Analytics
Synchrony

Scot Burdette
CIO
ABB

Suresh Ande
Global Head of Data & AI
Avis Budget Group

John Suguitan
Global VP, Strategic Executive Programs
C-Vision International (1)

DEFINING A GOOD AI PILOT AND KNOWING WHEN TO WALK AWAY

December 08, 2026
3:00 PM-4:15 PM

Eastern Time

Most agentic AI projects stall between demo and production, and the cost of that gap is becoming hard to ignore. Gartner expects over 40% of agentic AI initiatives to be canceled by the end of 2027 due to escalating costs, unclear business value, or inadequate risk controls, yet executives are still being asked to fund the next wave before the last one has demonstrated clear ROI. The challenge isn't the ambition of the models. Agents fail when they lack the data, definitions, or context to know which source to trust, and even accurate ones go unused when adoption and process are an afterthought. Join an exclusive group of data, analytics, and technology executives for a candid peer discussion on what it actually takes to move AI from experiment to everyday use. Together, we'll examine what separates the use cases relied on every week from those that quietly fade, what exit criteria and decision rights distinguish a disciplined pilot from an open-ended one, and how leading organizations earn trust in the answers agents give. We'll explore how teams are allocating investment across data and context, the model and application, and change management, hear practical lessons from initiatives that reached production as well as those that were shut down, and leave with actionable strategies to measure ROI, accelerate time to production, and scale AI with confidence.
