MIGRATION & MODERNISATION AT SCALE: STRATEGIES FOR ENTERPRISE TRANSFORMATION

February 26, 2026
6:00 PM-9:30 PM
United Kingdom Time

Join us for a private executive engagement dedicated to exploring how modern organisations are advancing large-scale migration and modernisation initiatives. Through real-world perspectives and strategic insights, leaders will examine what it takes to successfully transition extensive application portfolios, accelerate modernisation programs, and unlock measurable value across their technology estates.
This curated discussion provides an environment for senior executives to exchange experiences, compare transformation strategies, and gain clarity on the operational, financial, and architectural considerations that influence migration outcomes at scale. Designed for CIOs, CTOs, and IT decision-makers, the session enables open, peer-level dialogue around the challenges and opportunities shaping modernisation today.
