EMPOWERING IT AND OT NETWORKS: RAPID RESPONSE, RESILIENT DEFENCE

February 28, 2024
5:30 PM-9:00 PM
Central European Time

In the dynamic landscape of cybersecurity, CISOs and CIO's shoulder the vital responsibility of not only cultivating cyber resilience but also orchestrating rapid responses to thwart attacks across organisational networks. This dinner session will offer an open discussion for all attendees on the pivotal role of a robust incident response strategy in accomplishing these dual objectives. In the session we will discuss the imperative for CISOs to seamlessly integrate proactive measures into their cybersecurity framework, bolstering the organization's resilience against potential threats and ultimately how they test these initiatives. Amid the ever-evolving realm of sophisticated attacks, this discourse will provide attendees with the ability to consider the proactive facets of incident response, ensuring not only detection and containment but also the strategic neutralization of cyber threats within their networks. This comprehensive approach serves as the foundation for sustaining organizational continuity and enhancing the overall security posture amidst the evolving cybersecurity landscape.
