MOVING AGENTS & GENAI FROM POC TO TRUE PRODUCTION

November 18, 2025
5:30 PM-9:00 PM
Eastern Time

Agents represent the next frontier of GenAI, yet few investments move beyond the proof-of-concept stage. This session unpacks what it really takes to operationalize agents and GenAI at scale, with lessons to avoid common traps and strategies to achieve true production impact on AWS. Sponsored by Loka, the 2024 AWS Innovation Partner of the Year, their leaders will share how they've taken more than 50% of 400+ GenAI projects into production—and how your team can replicate that success.
