PREPARING FOR PEAK SEASON. FRAUD, TRUST, AND THE RISE OF AGENTIC COMMERCE.

November 05, 2026
6:00 PM-9:30 PM
Eastern Time

Peak season is no longer just a surge in transaction volume, it's a high-stakes battleground against increasingly autonomous, AI-driven threat actors. As agentic commerce transforms how legitimate consumers shop, malicious bots are adopting the exact same intelligence, executing sophisticated, high-speed fraud that easily bypasses traditional defenses.
Join us for a great meal, fine wine, and sharp conversation with industry peers as we unpack how leading brands are keeping the bad guys out, safeguarding trust, and keeping checkout frictionless this holiday season!
