**FROM VISION TO ACTION: BUILDING  
BLOCKS FOR NONPROFIT AI IMPACT**

**February 26, 2025**

3:00 PM-4:15 PM

Eastern Time

Nonprofit organizations are navigating an increasingly complex landscape, with growing demands for efficiency, impact, and innovation. AI promises to do more with less but how do you realistically integrate AI in your operations this year? In this panel session, industry leaders and technology experts will explore how nonprofits can harness the power of AI to achieve measurable outcomes.

Focusing on the foundational pillars of an effective AI solution—data platforms, AI services, and app services—we'll uncover how to build a resilient technology stack that takes your AI ideas from back of napkin to organizational impact quickly. Learn from real-world success stories where nonprofits have leveraged AI to drive operational efficiencies, enhance donor engagement, and amplify their mission impact.

Join us to discover actionable insights and practical strategies for leveraging Microsoft technologies to empower your organization and maximize your impact. Whether you're just starting your AI journey or looking to scale existing solutions, this session will equip you with the knowledge to make informed decisions for the future.
