**KEYNOTE**

**Securing the Future: How AI is Revolutionizing  
Cloud Security**

10:40 AM-11:05 AM

As organizations accelerate their cloud adoption, the complexity and scale of cyber threats are evolving just as rapidly. Traditional security approaches struggle to keep pace with the speed and sophistication of modern attacks. Enter AI—the game-changer in cloud security.

This keynote will explore how AI-driven security solutions are transforming threat detection, risk mitigation, and compliance in the cloud. From predictive analytics that identify vulnerabilities before they are exploited to automated incident response that reduces dwell time, AI is redefining how businesses protect their most valuable digital assets. Join us to discover how organizations can harness AI to build a resilient, future-ready cloud security strategy that balances innovation with risk management.

---

## KEYNOTE PANEL

11:10 AM-11:55 AM

### Building Cyber Fortitude: CISO Strategies for Resilient Cybersecurity

In the realm of building cyber resilience, organizations confront increased risk exposure amidst bold moves and evolving external challenges. Despite investments in technology and data, risk leaders, including CISOs, express difficulty in keeping pace with the persistent threat of cyber crises. However, in today's business landscape, discussions of digital transformation or reinvention are inseparable from considerations of cybersecurity. Looking ahead, stakeholders, from the board to frontline cybersecurity operations, pose critical questions about resiliency. This includes inquiries about the adequacy of efforts to safeguard the company and its customers in the face of cyber attacks. The focus shifts to identifying opportunities to minimize the impact on business and shareholder value through effective threat response. Embracing cybersecurity as a whole-of-business endeavor, organizations are urged to align themselves with business owners, adapting to changes in the cyber landscape and fortifying resilience against disruptions. Building confidence in the cybersecurity program becomes paramount in navigating the dynamic and challenging cyber landscape effectively.

## PANEL

12:15 PM-1:00 PM

### Cybersecurity Leadership in the Era of AI and ML: Navigating Innovation and Responsibility

In the dynamic realm of artificial intelligence (AI) and machine learning (ML), CISOs play a pivotal role in leveraging these advancements for enhanced cybersecurity. Strategic integration of AI and ML is essential for bolstering security measures, optimizing decision-making, and driving innovation. CISOs must adopt a comprehensive approach, considering the entire lifecycle of these technologies to ensure both efficiency and ethical use. Establishing robust governance frameworks becomes paramount, addressing biases, ensuring transparency, and minimizing unintended consequences.

Looking ahead, as AI and ML continue to advance, CISOs face evolving challenges and regulatory considerations. Proactive engagement involves staying informed about changing regulations, particularly in areas such as data privacy and ethical AI practices. CISOs should strive for a tech-enabled understanding of AI and ML systems, encompassing deployment, impact, and security measures. This approach positions organizations to navigate the regulatory landscape effectively, ensuring responsible and competitive integration of AI and ML into cybersecurity strategies.

## Lunch & Networking

1:00 PM-2:00 PM

---

## DISRUPTOR

2:00 PM-2:15 PM

### Next-Level Innovations: Unveiling GenAI - The Hype, The Reality, and The Future

We will explore the evolution of Generative AI, from its inception to its transformative impact across various industries. Experts will discuss the disparity between the media-driven hype and the technology's real-world capabilities, sharing case studies and addressing current challenges. The conversation will also cover the economic and ethical implications of Gen AI, providing insights into its future advancements and regulatory landscape. Attendees will gain a nuanced understanding of Gen AI's potential and the strategic considerations necessary for its successful integration into diverse sectors.

---

## FIRESIDE CHAT

2:20 PM-2:55 PM

### 2025 Executive Evolution: Mastering the Art of Business-Technology Harmony

Bridging the gap between business and technology is not easy and requires discipline and balance between technology, people, and business. For so many organizations today, technology is the business. Technology needs to be understood as a critical enabler in every part of the organization from the front line to the back office. It creates new value by crunching data to deliver new insights, it spurs innovation, and it disrupts traditional business models.

For business and technology leaders alike, new actions and behavioral changes can help their organizations make this shift. CIOs and CISOs must take responsibility for problems, they should convey that when technology fails, many people typically share responsibility.

---

## FIRESIDE CHAT

2:40 PM-3:15 PM

### Empowering Women Leaders in Technology: Driving Innovation, Digital transformation and Embracing the Future

In this insightful panel discussion where visionary female leaders in technology will share their strategies for fostering a culture of innovation, making high-velocity decisions, and leveraging emerging technologies like Generative AI to drive digital transformation. The panelists will offer practical advice on increasing diversity in tech teams, cultivating innovative thinking, and preparing organizations to embrace change. They will also reflect on their unique career journeys and share valuable lessons in working with customers who have navigated digital transformations. This session is a must-attend for CIOs, CISOs, CTOs, and VPs of IT in enterprise companies seeking to navigate change, drive innovation, and shape the future of their organizations

## Networking Break

2:55 PM-3:15 PM

## **Navigating the Cyber Frontier: CISO Strategies for Effective Risk Management**

In the context of effective cyber risk management, the challenge lies in keeping up with evolving technology, particularly during cloud or technology transformations. The adoption of threat intelligence, Gen AI, the metaverse, and machine learning presents both opportunities and challenges, with a need for technology leaders to grasp the security implications. While these technologies enhance cyber risk management, they also offer efficiencies through task automation. Striking a balance between risks and rewards is crucial for gaining trust and staying competitive. Looking forward, organizations must explore innovative approaches to cyber risk management, emphasizing resilience against third-party risks. Collaboration with the leadership team is essential to take an enterprise-wide view of current and future threats, develop action plans, safeguard critical assets, and facilitate quick recovery. Early collaboration with the executive team is encouraged to integrate risk management into transformation strategies and extract maximum benefits from emerging technologies.
