THE FUTURE OF APPSEC AND HOW TO ELEVATE IT TO A BOARD LEVEL DISCUSSION

September 21, 2023

5:30 PM-9:30 PM

Eastern Time

The Cybersecurity industry has been changing fast and Developers are increasingly using Open Source libraries and AI as necessary resources to build applications faster but they are also known to come with vulnerabilities that can all-too-easily make it into products. Many companies have learned their lesson the hard way that these vulnerabilities can have disastrous outcomes, Board members have learned these lessons, too, and now want more frequent updates and insight into security initiatives.

Join us to hear and discuss:

- Top board members' concerns and priorities
- Presenting information and metrics in a way that board members understand
- Getting board buy-in on your plans and budget to stay ahead of the threat landscape and innovation curve
