ENTERPRISE-GRADE GENERATIVE AI

November 05, 2024
5:30 PM-9:00 PM

Pacific Time

What's in it for the Customers and Prospects? While AI and GenAI are at the forefront of every leader's mind, the successful adoption of enterprise-grade generative AI applications in production hinges on a robust and trusted data foundation. A strong data foundation demands scalability, data quality, seamless integration, governance, and security to ensure that generative AI applications produce relevant, accurate, trustworthy, and unbiased outcomes. Leaders who join will experience education and networking opportunities that will help them learn these topics: GenAI's promise and common pitfalls Considerations for successful GenAI implementation in the enterprise Requirements for AI-ready data foundation and how data can be your GenAI differentiator Best practices for delivering Enterprise Ready GenAI at scale with Informatica & AWS

TOGETHER WITH

aws Informatica from Salesforce
