ARCHITECTING THE FUTURE OF SOFTWARE DATA

March 11, 2025
5:30 PM-9:00 PM

Pacific Time

Join us for an exclusive dinner exploring the transformative power of data in software development. What's at stake? Software companies are grappling with building scalable SaaS applications, managing complex data pipelines, ensuring data security and compliance, and accelerating development cycles. How can you effectively harness data to build innovative products, improve performance, and gain a competitive edge? Our discussions will:

Explore emerging software data trends and their impact on application development and deployment.
Uncover key challenges in building data-driven software strategies, from scaling to security.
Debate critical choices around data architecture, AI integration, and technology adoption.
Leave with actionable insights on building a robust software data foundation, leveraging AI for enhanced applications, ensuring data security, and navigating the multi-cloud world. Space is limited. Register your interest today.
