

AGENDA

Brains Need a Backbone: Databases for the GenAI Era

Executive Dinner

SPEAKERS

**Muthukumar
Devadoss**

Director, Information
Security
TradeWeb Markets

Trista Huang

SVP Technology &
Analytics
BRE Hotels &
Resorts -
Blackstone's

Louie Celiberti

Founder & CEO
E27 Technology
Solutions

Sigal Gino

Director Cloud
Engineering
WPP Media

Tom Yang

Director,
Engineering
NBCUniversal

**Viktoriya
Smith**

SVP
Citi

**Ibrahim
Jackson**

Founder & CEO
Ubiquitous Preferred
Services

Wim Verleyen

AVP Data Science,
Research and
Development
Humana

Nikit Assudani

VP Multi-Cloud
Product & Risk
Delivery Manager
JP Morgan Chase

BRAINS NEED A BACKBONE: DATABASES FOR THE GENAI ERA

July 22, 2025

5:30 PM-9:00 PM

Eastern Time

Databases are fundamental to AI applications, providing the critical infrastructure for managing the vast volumes of structured and unstructured data that power intelligent systems. As organizations look to streamline the development and deployment of generative AI agents, new innovations are emerging to simplify and accelerate this process. These include tools for secure large language model (LLM) hosting, real-time vector processing, efficient unstructured data ingestion, and customizable agent frameworks. Enhanced data workflows and built-in operational safeguards allow developers to build scalable, responsive AI applications with greater confidence and control.
