GOVERNED AI FOR REGULATED ENTERPRISE: FEDERATION MEETS TRUST

September 17, 2026
5:30 PM-9:00 PM
Eastern Time

For regulated enterprises — financial services, healthcare, insurance, and government — AI's biggest blocker isn't performance or model choice, it's compliance-safe access to fragmented, sensitive data. Join us for an exclusive executive dinner to learn how federated access and joint governance are helping regulated industries modernize risk, compliance, and reporting workloads without costly migration or loss of control over where data lives.
