FROM MODELS TO MEANING: TEACHING AI THE BUSINESS OF FINANCIAL SERVICES

September 03, 2026

3:00 PM-4:15 PM

Eastern Time

AI success in financial services depends on more than powerful models. It requires giving AI the business context to understand products, customers, regulations, risk, and operations the way financial experts do. Join this session to explore how organizations can move beyond generic AI and build intelligent systems that deliver more accurate insights, better decisions, and measurable business value through context-driven AI.

CHAIR

John Suguitan
