FROM PILOT TO PLANT FLOOR: MAKING THE AGENTIC ENTERPRISE REAL

November 19, 2026
6:00 PM-9:30 PM
Central Time

Everyone's piloting AI. Far fewer can show the return. Join finance and technology leaders from industrial manufacturing and beyond for a relaxed dinner and an off the record conversation about moving agentic AI from experiments to measurable results in production, supply chain, and maintenance.
We'll compare notes on what's paying off, what's stalled, and who owns the decision when an agent starts making it. Come ready to share. No slides and no sales pitch, just a great meal, good company, and the kind of conversation that's hard to have at the office. Space is limited.
