ARCHITECTING TRUST: THE UNTOLD RISKS & HARD TRUTHS OF DEPLOYING AI AGENTS IN FINANCIAL SERVICES

June 11, 2026
5:30 PM-9:00 PM
Eastern Time

Join us for an evening that strips away the marketing hype to address the cold, hard realities of deploying Agentic AI in highly regulated, mission-critical environments.

The Hard Truth for FSI The AI ecosystem is racing ahead with concepts that look powerful in isolation, but are incredibly brittle when exposed to the real-world complexity of enterprise financial systems. Agentic AI fundamentally changes your threat model and expands the blast radius. Unlike traditional automation, these systems have write-access—making a compromised agent a "digital insider" capable of triggering workflows across your estate.

We know that as IT leaders, you are the ones held accountable for the results, the risk, and the failure modes. This roundtable is designed by former FSI practitioners to confront the realities of accountability, unit economics, and systemic risk that keep CTOs and CISOs awake at night.
