THE PROMISING FUTURE OF ARTIFICIAL INTELLIGENCE (AI): OPPORTUNITIES AND CHALLENGES AHEAD

December 11, 2023
5:30 PM-9:00 PM
Eastern Time

The potential of Artificial Intelligence (AI) is vast, as it is now being utilized across all industries. With the combination of machine learning, AI has made significant improvements in the field of cybersecurity. GenAI is taking software development by storm. Will it make software more secure or less? This talk will discuss risks and mitigations when using GenAI to create code and how GenAI can be used for application security tools.

SPEAKER

Chris Wysopal
