HYBRID AI FOR ENTERPRISES
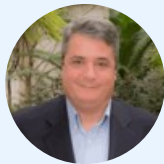

June 20, 2023
3:00 PM-4:15 PM

Pacific Time

With the recent spate of announcements in the generative AI space (e.g., ChatGPT, Bard, Bedrock etc.) there is a lot of interest within organizations to leverage AI and make it a key part of operations for all their internal groups (e.g., finance, HR, marketing, customer support, engineering, sales etc.). As organizations embark upon this journey, they must make decisions with respect to cost, performance, security, simplicity, and sustainability while coming up with the implementation architecture.

This is a roundtable discussion to provide shared insights on best practices on how organizations can deploy production grade AI solutions.

CHAIR

Jim Rutt
CIO/CISO
Dana Foundation

PANELISTS

Dustin Sachs
