PANEL

Promoting & Enabling Women to Succeed

10:25 AM-11:15 AM

How do we come together, as a group of professionals, to create and foster an inclusive business world where all women have a role to play? We know that a major part of this is attracting and retaining talent at every level but how exactly do we do that and where can we use technology to help? Our panelists will discuss how their companies are creating more inclusive environments, the use AI tools to help uncover hidden biases, what flexibility looks like for all team members and how they are advancing women earlier and signing them up for long term success.

Mid-Morning Networking Break

11:15 AM-11:25 AM

Take a stretch, grab a tea or coffee and connect with others during these 25 minutes.

PANEL

Leveling Up: How to Stand Out in Your Organization

11:45 AM-12:30 PM

Despite years of conversations and programs by industry stakeholders to diversify the talent pool standing out in an inherently biased environment is a challenge women still face. How have women in leadership roles risen above this and succeeded? What real lessons can we learn from savvy leaders on successfully adjusting their business priorities, reinvesting budgets to drive growth, and taking a smart path to business transformation during times of great disruption.

Lunch

12:30 PM-1:40 PM

Join us for a TED Talk on *Designing the Future of Cancer Education* with Corrine Ellsworth-Beaumont, CEO of Know Your Lemons Foundation.

FIRESIDE CHAT

1:45 PM-2:30 PM

Leading and Innovating Through Times of Change

This session explores the important role of leaders in driving innovation during times of change. It highlights the need for leaders to be proactive in anticipating and responding to change, rather than simply reacting to it. The session also provides practical strategies for leading innovation, including how to create a culture of innovation, how to develop and implement innovative ideas, and how to effectively communicate change to stakeholders. Overall, the session aims to equip leaders with the skills and knowledge needed to navigate change successfully and foster a culture of innovation within their organizations.

PANEL

2:20 PM-3:05 PM

Exploring the Digital Future

Digital Transformation is helping to improve operational efficiency, productivity, and resiliency with organizations of all sizes and types. How do we select the right technologies and measure the return on investment? What skillsets, trainings and messaging are essential to have successful implementation and adoption of these technologies?

Afternoon Snack

3:05 PM-3:15 PM

Listen to some music and move a little during this break between content.

PANEL

Data Drives Transformation

3:15 PM-4:00 PM

Data is a key enabler for all of the CXO's plans to transform and should be at the heart of any organizational strategy. All of the digitization in our world today means we have enormous amounts of data available, and data has now become the number one business asset for every organization. The utilization of data has grown exponentially giving organizations the ability to better understand customers, research key trends, and much more. Enterprises are heading towards an environment of uncertainty and ambiguity that requires continuous flexibility, innovation and investment or reinvestment in data and analytics strategies.

How can you use AI to drive customer acquisition, better demand forecasting and use business intelligence to help gain a lead over competitors.

Unlocking the Potential of AI: How Marketing Leaders Can Overcome the Unknown

4:05 PM-4:50 PM

Artificial intelligence (AI) has become an enigmatic force in the world of marketing. While it promises to revolutionize the industry, many

leaders are uncertain about how to navigate this unknown territory. This abstract will delve into the mysterious world of AI and explore its potential use cases for marketers. With the pressure to do more with less and the need to stay ahead of the competition, marketers must consider the benefits of leveraging AI. However, the unknown potential of AI can also create hesitation and skepticism. Leaders must approach AI with a strategic mindset, collaborate with their IT teams, and identify the right use cases to position their organization for success in this uncharted landscape.
