FROM PROOF-OF-CONCEPT TO PRODUCTION. SCALING ENTERPRISE AI AGENTS

October 29, 2026
5:30 PM-9:00 PM
Pacific Time

AI agents are moving out of the lab and into production, but most enterprises underestimate what it takes to orchestrate them at scale—especially when your agents need to reach customers across voice, SMS, email, and every channel in between. Join us for an exclusive, private dinner with a select group of peers to cut through the noise over great food and candid conversation. Together, we'll discuss what it actually takes to build future-proof architecture, orchestrate agent interactions across channels, optimize vendor and infrastructure strategies, and organize teams for long-term execution. Come share what's working, what's failing, and where the biggest opportunities lie in real time.
