Shaping Hybrid Workforce Security with SASE Today and Tomorrow

The Secure Access Service Edge (SASE) market is evolving fast—and 2025 is set to be a pivotal year. Join Alexandra Méhat, Director of Product Marketing, as she unveils five major trends redefining how enterprises secure their hybrid workforce.

Join us for key takeaways, such as:

The top SASE market trends and technologies for 2025

How modern organizations are transforming security strategies with Unified SASE

A preview of upcoming Fortinet innovations that boost performance, security, and cost-efficiency

Expert insights on simplifying operations, lowering TCO, and gaining full visibility across distributed networks

Gain a competitive edge by understanding where the SASE market is heading and how to prepare your organization today.

From finance to healthcare to government—if you're leading or influencing networking and security decisions, this session is built for you.

KEYNOTE PANEL

10:10 AM-10:55 AM

The Role of Mentoring & Sponsorship in Advancing Women Leaders

How do we come together, as a group of professionals, to create and foster an inclusive business world where all women have a role to play? We know that a major part of this is attracting and retaining talent at every level but how exactly do we do that and where can we use technology to help? Our panelists will discuss how their companies are creating more inclusive environments, the use of AI tools to help uncover hidden biases, what flexibility looks like for all team members and how they are advancing women earlier and signing them up for long-term success.

VISION VOICES

AI Literacy as a Catalyst for Enterprise Transformation in UN Peace Operations

11:15 AM-11:30 AM

As artificial intelligence reshapes industries worldwide, fostering AI literacy within UN peace operations is essential for driving innovation, enhancing decision-making, and advancing mission objectives. This session explores how cultivating a culture of AI understanding across teams can unlock the potential of emerging technologies to improve operational efficiency, data-driven insights, and conflict resolution strategies.

Under my leadership as Chief Information Management Officer, we have prioritized efforts to provide AI literacy through tailored training programs and workshops that empower personnel to integrate AI into their workflows effectively. A gradual rollout of Microsoft Copilot Studio and Office 365 Copilot has allowed teams to experience the practical benefits of AI-assisted tools, enhancing collaboration and productivity in a phased, manageable manner. Simultaneously, we are exploring internal large language model (LLM) developments to ensure contextually relevant and secure AI solutions tailored to the unique needs of peace operations.

By embedding AI literacy and gradually introducing transformative tools, we aim to create a culture of informed innovation that aligns technological advancements with the mission of global peace and security.

FIRESIDE CHAT

11:35 AM-12:10 PM

The Vulnerable C-Suite: Why Personal Cybersecurity is the New Frontline for CISOs

Businesses and their leadership teams are increasingly being targeted – physically and digitally. Research from The Ponemon Institute shows that 42% of CISOs report attacks targeting executives' personal lives – a number that will only climb as cybercriminals evolve their attack methods.

Cybercriminals are increasingly leveraging executives' personal digital presence as an entry point into corporate networks. Traditional cybersecurity focuses on corporate systems, leaving executives' personal digital lives exposed – creating a significant risk vector for organizations.

PANEL

12:15 PM-1:00 PM

Revolutionizing Customer Journeys: Advanced Strategies for CMOs to Enhance and Optimize the Customer Experience

In today's fast-evolving digital landscape, CMOs and Marketing leaders are under increasing pressure to deliver exceptional customer experiences at every touchpoint. This panel will explore cutting-edge strategies and advanced technologies that are shaping the future of customer journeys. Experts will discuss how marketing leaders can leverage data-driven insights, personalized engagement, and omnichannel marketing to enhance customer satisfaction, loyalty, and lifetime value. Attendees will learn how to optimize the customer experience by aligning their marketing efforts with evolving consumer expectations, breaking down silos across departments, and driving seamless interactions that foster long-term relationships. Whether it's utilizing AI-powered tools, incorporating voice-of-the-customer feedback, or refining content strategies, this session offers actionable insights for CMOs looking to stay ahead in an increasingly competitive market.

VISION VOICES

2:00 PM-2:15 PM

Creating From Within Vs. In Reaction To

An empowered woman writes her own life story, but it's easy to become reactive during chaotic times and feel like life is happening to you instead of for you. Jessica shares how she transitioned from a reactive mode of living to empowered co-creation by honoring her inner knowing over external circumstances. This shift enabled her to leave a life that wasn't fulfilling and move towards her dreams. In unstable times, she emphasizes the importance of remembering that the truth in your heart is more real than what you see. In this short talk, Jessica will explain how to use this mantra to co-create through principles like Intention Alignment and Maintaining Presence.

FIRESIDE CHAT

2:20 PM-2:55 PM

2025 Executive Evolution: Mastering the Art of Business Marketing and Technology Harmony

Bridging the gap between business marketing and technology is not easy and requires discipline and balance between technology, people, and business. For so many organizations today, technology is the business. Technology needs to be understood as a critical enabler in every part of the organization from the front line to the back office. It creates new value by crunching data to deliver new insights, it spurs innovation, and it disrupts traditional business models.

For business and technology leaders alike, new actions and behavioral changes can help their organizations make this shift. CIOs and CISOs must take responsibility for problems, they should convey that when technology fails, many people typically share responsibility.

PANEL

3:00 PM-3:45 PM

Empowering Women Leaders in Technology: Driving Innovation, Digital transformation and Embracing the Future

In this insightful panel discussion where visionary female leaders in technology will share their strategies for fostering a culture of innovation, making high-velocity decisions, and leveraging emerging technologies like Generative AI to drive digital transformation.

The panelists will provide practical guidance on enhancing diversity within tech teams, cultivating a mindset of innovation, and preparing organizations to adapt in an increasingly dynamic technological landscape. Drawing from their diverse career paths, they will also share key lessons learned from supporting digital transformation efforts across both the public and private sectors.

This session is a must-attend for CIOs, CISOs, CTOs, and VPs of IT in enterprise companies seeking to navigate change, drive innovation, and shape the future of their organizations

IT and Marketing Leadership Evolution: Innovating Through Times of Change

The role of driving innovation during times of change is important for all leaders to master. You must be proactive in anticipating and responding to change, rather than simply reacting to it. We'll discuss how success team leaders have created a culture of innovation, how to develop and implement innovative ideas, and how to effectively communicate change to stakeholders.
