Cultivating Inclusive Excellence: Driving Diversity in Technology Leadership

Let's explore the imperative of diversity in technology leadership roles, particularly within the CIO and Security domain. From gender and ethnicity to varied professional backgrounds, diverse perspectives foster innovation, resilience, and better decision-making in today's rapidly evolving tech landscape. Join us as industry leaders share their experiences, insights, and strategies for promoting inclusivity, breaking down barriers, and empowering underrepresented groups in technology leadership roles. From fostering inclusive cultures within organisations to implementing proactive recruitment and mentorship initiatives, attendees will gain actionable insights to drive meaningful change and cultivate diverse, high-performing technology teams. Let's chart a course towards inclusive excellence in technology leadership together.

PANEL

1:50 PM-2:35 PM

2025 Executive Evolution: Mastering the Art of Business-Technology Harmony

Bridging the gap between business and technology is not easy and requires discipline and balance between technology, people, and business. For so many organizations today, technology is the business. Technology needs to be understood as a critical enabler in every part of the organization from the front line to the back office. It creates new value by crunching data to deliver new insights, it spurs innovation, and it disrupts traditional business models.

For business and technology leaders alike, new actions and behavioral changes can help their organizations make this shift. CIOs and CISOs must take responsibility for problems, they should convey that when technology fails, many people typically share responsibility.

VISION VOICES

AI Literacy as a Catalyst for Enterprise Transformation in UN Peace Operations

As artificial intelligence reshapes industries worldwide, fostering AI literacy within UN peace operations is essential for driving innovation, enhancing decision-making, and advancing mission objectives. This session explores how cultivating a culture of AI understanding across teams can unlock the potential of emerging technologies to improve operational efficiency, data-driven insights, and conflict resolution strategies.

Under my leadership as Chief Information Management Officer, we have prioritized efforts to provide AI literacy through tailored training programs and workshops that empower personnel to integrate AI into their workflows effectively. A gradual rollout of Microsoft Copilot Studio and Office 365 Copilot has allowed teams to experience the practical benefits of AI-assisted tools, enhancing collaboration and productivity in a phased, manageable manner. Simultaneously, we are exploring internal large language model (LLM) developments to ensure contextually relevant and secure AI solutions tailored to the unique needs of peace operations.

By embedding AI literacy and gradually introducing transformative tools, we aim to create a culture of informed innovation that aligns technological advancements with the mission of global peace and security.

Revolutionizing Tomorrow: A Deep Dive into Innovation through Emerging Technologies

In this strategic session designed for CIOs and CISOs we dive into the transformative realm of "Innovate through Emerging Tech." As technology stewards, CIOs play a pivotal role in navigating the rapidly evolving landscape of emerging technologies—such as artificial intelligence, blockchain, and the Internet of Things. The session provides CIOs with actionable insights into leveraging these technologies to drive innovation within their organizations. Attendees will explore practical strategies for implementation, addressing potential challenges, and ensuring ethical considerations in adopting these disruptive technologies. Join us to empower your role as a technology leader and discover how CIOs can strategically leverage emerging tech to propel their organizations into the forefront of innovation.

Empowering Women Leaders in Technology: Driving Innovation, Digital transformation and Embracing the Future

In this insightful panel discussion where visionary female leaders in technology will share their strategies for fostering a culture of innovation, making high-velocity decisions, and leveraging emerging technologies like Generative AI to drive digital transformation. The panelists will offer practical advice on increasing diversity in tech teams, cultivating innovative thinking, and preparing organizations to embrace change. They will also reflect on their unique career journeys and share valuable lessons in working with customers who have navigated digital transformations. This session is a must-attend for CIOs, CISOs, CTOs, and VPs of IT in enterprise companies seeking to navigate change, drive innovation, and shape the future of their organizations

KEYNOTE PANEL

The Role of Mentoring & Sponsorship in Advancing Women Leaders

How do we come together, as a group of professionals, to create and foster an inclusive business world where all women have a role to play? We know that a major part of this is attracting and retaining talent at every level but how exactly do we do that and where can we use technology to help? Our panelists will discuss how their companies are creating more inclusive environments, the use AI tools to help uncover hidden biases, what flexibility looks like for all team members and how they are advancing women earlier and signing them up for long term success.

FIRESIDE CHAT   3:55 PM-4:30 PM

Leadership Evolution: Innovating Through Times of Change

The role of driving innovation during times of change is important for all leaders to master. You must be proactive in anticipating and responding to change, rather than simply reacting to it. We'll discuss how success team leaders have created a culture of innovation, how to develop and implement innovative ideas, and how to effectively communicate change to stakeholders.
