

AGENDA

Speeding Up the Future: Overcoming Challenges in Data Pipelines with Automation and AI

Executive Dinner

SPEAKERS

Anirudh Sridhar
Director of Product
Management
Salesforce

Vikram Makhija
Senior Director Cloud
Security
Google

Anand Raghavan
VP of AI Innovation
Cisco

Steve Zalewski
Former CISO
Levi Strauss & Co.

Andrew Yu
VP of IT Engineering
Okta

Dave Kellermanns
Global Advisor
Broadcom

Mark DePledge
Automation Solution
Strategist
Broadcom

Alok Arora
Head, AI/ML
Customer
Engineering at
Google Cloud
Google

Sai Kumar Arava
Head of CDP ML
Application
Adobe

Dave Newton
VP Supply Chain
Technology
Albertsons
Companies

Meghana Puvvadi
Director AI/ML
Enterprise
NVIDIA

**SPEEDING UP THE FUTURE: OVERCOMING
CHALLENGES IN DATA PIPELINES WITH
AUTOMATION AND AI**

March 26, 2025

5:30 PM-9:00 PM

Pacific Time

With their internal approach to automation solutions, new technologies, like cloud-based data pipelines, should be considered an island of automation. They must be woven into a business-centric automation layer (which Forrester and EMA call fabric and Gartner call BOAT). Key to this is the value of Unified Observability, Multi-Cloud Orchestration and Automation Intelligence, which provides a complete 360-degree view of the business process, modularity to adjust for ever-changing technologies and its improvement potential. But how does AI factor in this? AI is a data pipeline exercise that needs to be managed and ideally automated.

CHAIR

IN PARTNERSHIP WITH
