## SECURING AI AT SCALE

**September 17, 2026**
5:30 PM-9:00 PM
Eastern Time

Enterprise adoption of GenAI and Agentic AI is accelerating, creating new opportunities for innovation while introducing unprecedented security, governance, and compliance challenges. As organizations deploy generative AI, autonomous agents, and AI-powered applications across multi-cloud environments, security leaders must rethink how they protect sensitive data, manage Agentic identities, Agents accessing critical systems and secure increasingly complex application ecosystems. Join an executive discussion with industry peers to explore actionable strategies for balancing AI innovation with security, trust, and regulatory requirements.
