AI UNLEASHED: POWERING ENTERPRISE-WIDE TRANSFORMATION IN THE ENERGY SECTOR

November 10, 2025
5:30 PM-9:00 PM
Central Time

Join an exclusive gathering for strategic dialogue on the transformative potential of Agentic and Generative AI technologies. This executive roundtable dinner brings together industry leaders to tackle the critical question: How do we move beyond pilot programs to achieve enterprise-wide AI adoption?

Our discussion will explore the real barriers holding back widespread implementation—from technical challenges to organizational resistance—and uncover practical solutions that drive meaningful results. Through candid peer-to-peer conversations, you'll discover proven strategies for scaling AI initiatives, building internal capabilities, and fostering productive partnerships with technology providers.

This isn't another theoretical AI summit. It's a working session where energy executives will share battle-tested insights, confront common roadblocks, and develop actionable roadmaps for AI transformation. Leave with concrete next steps, valuable connections, and renewed confidence in your AI strategy.
