**APPLICATION SECURITY IN A DEVOPS,  
CLOUD AND API WORLD**

**April 14, 2022**

7:30 PM-11:00 PM

Central European Time

Security teams are challenged to modernize application security practices in light of accelerating shifts to DevOps delivery models and rapid adoption of cloud-native application designs. Applications built on microservices (e.g. serverless, containers, APIs) and delivered continuously are outpacing application security teams ability to secure them. CISOs need to consider new skills, new touch points and new platforms to maintain a strong security posture in light of these trends and the speed at which they are re-shaping IT.

## PANELISTS

**Olivier Daloy**  
Group CISO  
Faurecia

**Robert Smith**  
Field CISO  
Noname Security

**Eric Bouthier**  
Deputy Global CISO  
Agence Francaise De  
Developpement

**Abdel Dahmana**  
Cyber Security  
Manager  
Wissal Group
