**THE WHY, HOW & WHAT OF CUSTOMER
DATA PLATFORM 'SMART HUBS'**

May 23, 2023

8:30 AM-11:00 AM

United Kingdom Time

Consumers today expect relevant, meaningful, consistent experiences at each and every intersection with a brand. If a buyer

purchases a product via an Instagram ad, they don't want an email days later pushing the same item. They want smart communications, personalized content, speed, and an all-around reliable and cohesive brand experience. The problem is this caliber of experience isn't easy to deliver, often because marketers do not have a centralized data strategy which allows them to see a 360 view of the customer. What's more, marketing technologies address different pieces of the omnichannel puzzle, so stringing solutions together to work as a cohesive, data-driven marketing technology (martech) stack is often a challenge.
