SECURING THE FUTURE: STRATEGIES FOR CIOS AND CISOS IN THE AGE OF EMERGING AND GENERATIVE TECHNOLOGIES

July 09, 2024
11:00 AM-12:15 PM
East Africa Time

In today's rapidly evolving digital landscape, the roles of CIOs and CISOs have never been more critical. This panel will explore the strategic imperatives for CIOs and CISOs as they navigate the challenges of digital transformation. We will discuss the integration of emerging technologies such as Generative AI and cloud computing while maintaining robust cybersecurity measures. Our expert panelists will share insights on balancing innovation with security, implementing effective data governance, and managing the risks associated with digital transformation. Join us to gain actionable strategies for protecting your organization's digital assets while driving technological advancement and business growth.
