INTEZER
Voice of the Customer

"I've looked at a lot of security solutions over the years and the results from Intezer's Ai-driven alert triage are actually amazing. Intezer integrates with all the modern security platforms, so teams have every alert fully investigated while enabling a fast time to respond. This technology is transformative for the efficiency and effectiveness of security operations."

MGM RESORTS

Branden Newman │ CTO

"Intezer has transformed the way we handle tier 1 triage. By automating the initial investigation process, we've cut down on the noise from alerts, allowing our analysts to focus on real threats. The platform's accuracy and efficiency have not only improved our response times but have also given our team more bandwidth to tackle higher-level challenges. Intezer is now a cornerstone of our security operations."

Head of Cybersecurity

Intezer Autonomous SOC Multiplies Analyst Capacity

"Intezer has always had the best malware analysis, and now the same capability can be used for autonomous SOC. Experience was great from proof of concept, through negotiations, and integration."

★★★★★ 5.0 **Gartner**

"Our partnership with Intezer allows us to leverage the power of AI to automate manual tasks and gain a deeper understanding of potential threats. By automating the triage of SIEM, EDR, and phishing alerts and providing us with enriched threat intelligence, Intezer empowers our security practitioners to focus on high-priority incidents and take decisive action to protect our clients' business operations and reputation."

CARBONHELIX

Mark Precious │ CEO

"We have a lean team, so automation is really critical to us. The amount of time that it takes to triage an event and understand what's really happening can eat into our ability to respond quickly. The more information that we have up front from Intezer when we get eyes on screen, the faster a human can make a decision about what to do. If we were to hire the amount of staff needed to respond at this scale, the cost could have been significantly higher too."

YAGEO YAGEO GROUP

Michael Calderin │ CISO

"GMI is committed to continually advancing our Security Operations offering - leveraging an artificial intelligence capability is no longer a nice to have but a requirement to stay ahead. Our security operations ingest enormous amounts of data and Intezer is helping us by enhancing threat detection, automating responses, and reducing the workload on our security team. With Intezer, we can quickly identify and mitigate risks, reduce the 'noise', and get our security teams focused on ensuring a more secure and resilient environment for our clients. "

GMI

Jim Radzicki │ President

It is more than an Incident Response! It is AUTOMATED RESPONSE!

"I like the interface; user-friendly, easy to configure, and reduces more tasks than you imagine. Automated everything with existing workflow and reduced tier1 escalation, the most critical aspect of current cybersecurity!"

★★★★★ 5 G2

"With Intezer, we know that every alert is thoroughly investigated so that our cybersecurity teams can respond quickly and protect our clients from ransomware and other cyber attacks."
