

Recovery Without the Complexity

Operational downtime isn't just an inconvenience - it's a direct hit to revenue, reputation, and customer trust. Most organizations have a basic recovery plan in place, but few have one that's truly tested, fully secure, and backed by recovery experts.

Assured Recovery by Assured Data Protection (Assured) offers organizations fast, reliable recovery from any disruption, including hardware failure, human error, natural disaster, or a cyberattack, minimizing downtime and safeguarding critical data.

Assured Recovery works with industry-leading platforms, including Rubrik, Nutanix, Zerto, and BackBox, matching the right recovery approach to the right environment, or blending across mixed requirements. Across multiple underlying technologies, the experience, service levels, and outcomes stay consistent, giving organizations peace of mind that, should the worst happen, operations can be restored swiftly and the business can continue.

Secure Replication

Assured replicates critical workloads and backup data to one of its global data centers, providing a geographically separated, encrypted copy.

Seamless Recovery

Assured hosts the main hypervisors for like-for-like recovery with Disaster Recovery (DR) workshops to ensure a comprehensive recovery plan.

Automated Testing

Orchestrated recovery testing that doesn't impact production, with full documentation to support audit and compliance requirements.

Recovery Without Compromise

Peace of Mind

Assured's recovery team offers expert, multilingual support, available 24/7/365.

Data Integrity

Isolated networking and infrastructure ensure a clean recovery environment.

Effortless Recovery

Rapid, unified switchover to a chosen recovery point minimizes manual steps and human error.

Data Sovereignty

Global data centers keep replicated data within the required jurisdiction for compliance.

BACKBOX

Built for Speed and Continuity

Swift, Reliable Recovery

Critical systems are back up and running swiftly, hitting Recovery Time Objectives (RTOs) that keep the business moving. Data and applications are recovered swiftly, either on-premises or into a dedicated cloud DR environment, using pre-configured, automated runbooks.

Minimal Data Loss

Recovery Point Objectives (RPOs) as low as one minute mean minimal data loss, whatever the scenario. Recover to any point in time, whether that's the latest version for everyday resilience, or an earlier, known-good point to step back before ransomware struck.

Seamless Reconnection

Employees are back to work fast, reconnecting through their organization's existing remote access setup, whether that's a VPN, SD-WAN, or virtual desktop. Recovery slots straight into how the business already operates, so there's no disruption to daily routines and no new tools for employees to learn.

Assured offers a flexible, consumption-based model to grow with your business, making data protection cost-effective and scalable. Their purpose-built software provides industry-leading monitoring and reporting capabilities to provide actionable insights into your data protection strategy. Their global data centers ensure data sovereignty, meeting your organization's compliance requirements. A dedicated team is always available to recover your data and minimize disruption in the event of a disaster.

Future Proof for Cloud

Assured's solutions allow you to move to the cloud non-disruptively with cloud-native protection.

Flexible Pricing

Assured offers a Capacity or Consumption model, which allows for a set price or a pay-per-use option.

Fully-Managed Service

Assured provides automated reporting, backup administration, and comprehensive technical support.
