

# MODERNIZATION FOR VMWARE WORKLOADS

## MARKET CHALLENGE

The Broadcom acquisition of VMWare has led many organizations to consider migrating to AWS Cloud and adopting cloud-native services. However, they face significant challenges, such as limited AWS expertise within their teams, uncertainty about where to begin, and concerns regarding security and compliance. Looming license renewal deadlines add further pressure. Organizations looking for an alternative to the lift and shift approach can consider the modernization strategy for a safe and reliable infrastructure migration.

SoftServe, a Premier Tier Services AWS Partner, has over 500 AWS-certified experts, 12 AWS Competencies, and numerous service delivery programs. We make it easy for customers to migrate to AWS Cloud, minimizing the risks associated with migrations.

## BUSINESS VALUE

Optimize costs by paying just for what you use and scale in, out, up, and down

Reduce management overhead by undertaking AWS Managed Services

Enhance your security posture and compliance

Simplify and enhance your disaster recovery and business continuity processes

Increase business agility and time to market

Empower your business through modern application development

Make your business more sustainable

Maintain and support post-migration

## HOW DOES IT WORK?

Begin with a flexible assessment focusing on the organization's priorities and considering the best migration paths.

Use SoftServe's accelerators for modernization and migration, such as:

- AWS Landing Zone customizations addressing security, compliance, and regulatory requirements.
- Well-architected SoftServe Application Modernization Platform for Amazon EKS, ECS, and Lambda.
- CAST SME-less application assessment.
- SoftServe's rtools2aws to better understand and optimize future AWS infrastructure costs.
- SoftServe's Microsoft Modernization Framework.

Transfer your VMWare skills to AWS skills and get your team's AWS certified.

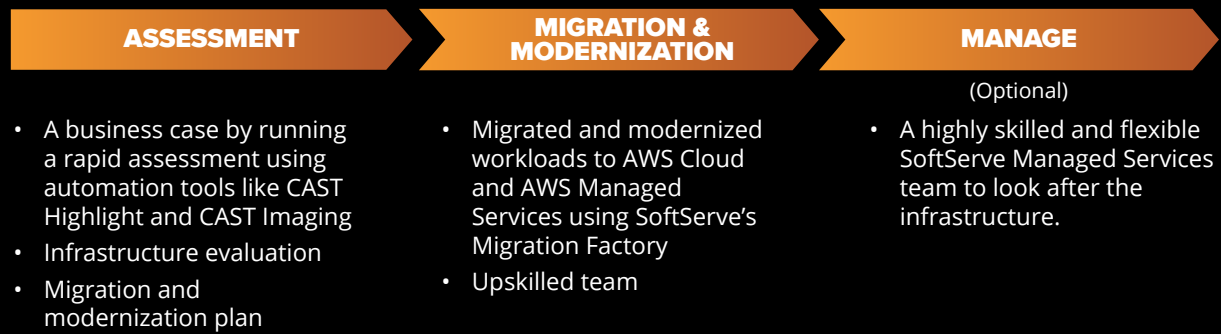

Include an optional pre-validation pilot.

Rely on proven SoftServe migration accelerators with safe and fast rollback.

Benefit from post-migration maintenance and support.

Leverage AWS funding programs to mitigate migration investment. \*

## WHAT DO YOU GET?

\* AWS funding programs for migration and modernization are available. Migration and modernization can be partially or fully covered by available funding, provided projects must meet all eligibility criteria.

## GLOBAL AWS PARTNERSHIP

As a Premier Tier Services Partner, SoftServe is an exceptional cloud guide that vastly decreases the time to cloud value while ensuring your cloud projects are deployed within AWS Well-Architected best practices.

Our AWS clients have come to rely on our speed, agility, and scalability as a non-reseller, agnostic service provider. We can deliver end-to-end solutions to the most complex enterprise challenges-ensuring our clients achieve the most benefit from AWS investments.
