BLUSAPPHIRE
ENTERPRISE SECURITY SIMPLIFIED

TRANSFORMING CYBERSECURITY

BluSapphire is a comprehensive cyber defense platform crafted meticulously from the ground up by BluSapphire Labs. Each aspect of our platform embodies innovation without reliance on third-party tools. We redefine cybersecurity for enterprises, offering cutting-edge solutions at unmatched value and with flexible contract options.

THE PROBLEMS WITH CYBERSECURITY TODAY

Lack of Flexibility

Many cybersecurity vendors provide inflexible, lengthy contracts devoid of exit options that fail to cater to specific business needs.

Escalating Costs and Hours

An average of 15 cyber tools per enterprise results in higher total cost of ownership and operational cost to manage.

Integration Challenges

Despite vendors' assurances of third-party integration, practical execution often falters due to technological constraints and architectural limitations.

Siloed Technology Stack

When multiple products and applications on different layers fail to communicate efficiently, security teams often get overwhelmed with the sheer number of alerts.

UNIFIED CYBER DEFENSE STACK
Our Solution Includes:

The BluSapphire Ecosystem

The core strength of Open Data Lake is its adaptability and seamless integration with third-party tools. This enables smooth interaction with all cybersecurity operations, elevating our platform's effectiveness.

Technology

Services
One Platform

- SIEM
- UEBA
- NBAD
- EDR
- Sandbox
- EPP
- Threat Intelligence
- SOAR
- Deception
- Threat Hunting
- SASE

MDR
Flexible 24x7 Managed Detection and Response Services.

On Demand
Incident Response, Compliance and Regulatory reporting.

Professional Services
Our vendor agnostic professional services ensure seamless integrations.

BLUSAPPHIRE
ENTERPRISE SECURITY SIMPLIFIED

BENEFITS

15-MINUTE RESPONSE TIME

68% IMPROVEMENT IN SECURITY POSTURE

62% REDUCTION IN CYBERSECURITY BUDGET

UNIFIED CYBER RESILIENCE

You can set up a Security Operations Center by combining multiple tools, but doing so complicates vendor and sales management. Plus, there are unbreakable siloes, scalability challenges, complex deployment efforts, little to no automation, and adoption challenges, which cause poor ROI. All of these problems can be solved by having a unified cybersecurity model, and that's exactly what BluSapphire offers.

EXPERIENCE UNMATCHED SECURITY

OUR MDR SOLUTION

DETECT
Achieve global network and cloud visibility with advanced threat detection.

ANALYZE
Gain insights and analytics, integrate data from 250+ sources.

RESPOND
Swiftly counter known and unknown threats with automated responses and holistic visibility.

REMEDIATE
Conduct live threat hunts using IoCs and MITRE Framework, exceeding NIST Level 5 standards.

ELEVATE CYBER RESILIENCE BY 300% REDUCING CYBER SPEND BY AT LEAST 30%

BLUSAPPHIRE
ENTERPRISE SECURITY SIMPLIFIED

TESTIMONIALS

Dramatically improved our SOC visibility and response times, while cutting our costs significantly.

VP OF SECURITY TIER II MSSP

Our cyber-detection capabilities increased drastically. Agentless quarantine has improved our response times.
