Tiger Global

All data has value, but not all at once. Today's excess data may be exactly what your company needs later to identify a trend, capture a new insight, comply with regulations, or any of a billion other uses. You can't do that if you don't have the data.

We get it. IT and security teams have so many data challenges: limited resources, massive growth of crazy data in all shapes and sizes, shrinking budgets, and growing compliance requirements. Plus, your data is now distributed across global systems, multiple clouds, and widespread data centers for even more cost and complexity. It seems like a simple decision: reduce your data problems by reducing your data, but we all know that simply reducing can create future challenges. What we need is a clear path to making sure the right data is in the right places and you can access whatever you need once you need it.

Cribl, the Data Engine for IT and Security teams, uses the power of the cloud to create a globally distributed data infrastructure that's capable of exploring and processing billions of events per second – from any source or data store, anywhere. It extracts only the valuable data that your IT and security teams need, when they need it, in the desired format, and with the ability to recall and rehydrate that data at will. And most importantly, it remains your data, stored in open formats, and accessible by whatever tooling you have now or in the future.

### Your data engine: software built for YOU

**OPEN**  
Own your data, in open formats, in your storage, with an open ecosystem. No lock-in, ever.

**FOCUSED**  
Software built for you. Focused on meeting your needs and adapting to your environment.

**PERFORMANT**  
Performs at global scale for petabytes of data. Designed for the scale and complexity of your data.

**VERSATILE**  
Highly customizable and adaptable. Can be deployed independently or as a unified engine.

**Meet your needs now and in the future with Cribl's product portfolio, adapting as your data complexities and requirements evolve. Our products aren't built for just anyone. They're built for you.**

## RECORD GROWTH

Surpassed \$100 million in annual recurring revenue in less than four years, becoming one of the fastest growing infrastructure companies to reach centaur status.

## ENTERPRISE ADOPTION

Customer base extends to 35 of the Global 100 companies and represents 24% of the Fortune 1000.

## SEAMLESS INTEGRATIONS

Rely on seamless integrations with tools from Elastic, Splunk, or CrowdStrike. Analyze, collect, process, and route your data no matter where it is.

## STRONG BACKING

Investment from top Silicon Valley VCs, with over \$400 million in funding.

## EXPERIENCED LEADERSHIP

Executives from industry-pioneering companies including Splunk, Google, Snowflake, ServiceNow, AppDynamics, and Amplitude.

## FIRST PRINCIPLES

Software designed with a customer-first mentality to solve real problems from the ground up.

## AWARDS AND RECOGNITION

## CUSTOMERS

### ABOUT CRIBL

Cribl, the Data Engine for IT and Security, empowers organizations to transform their data strategy. Customers use Cribl's vendor-agnostic solutions to analyze, collect, process, and route all IT and security data from any source or in any destination, delivering the choice, control, and flexibility required to adapt to their ever-changing needs. Cribl's product suite, which is used by Fortune 1000 companies globally, is purpose-built for IT and Security, including Cribl Stream, the industry's leading observability pipeline, Cribl Edge, an intelligent vendor-neutral agent, and Cribl Search, the industry's first search-in-place solution. Founded in 2018, Cribl is a remote-first workforce with an office in San Francisco, CA.
