

Ensure Resiliency Against Cyber Threats

In today's rapidly evolving threat landscape, companies face an unprecedented array of risks, from relentless cyber threats to unforeseen natural disasters. As these challenges grow in complexity and frequency, the need for a robust data protection solution becomes paramount.

Assured Data Protection (Assured) offers a comprehensive suite of fully-managed solutions designed to protect your critical information against these multifaceted threats. Leveraging the advanced capabilities of Rubrik's cyber recovery platform, Assured delivers resilient, cloud-optimized backup, disaster recovery, and cyber resiliency solutions to ensure business continuity and minimized downtime for your organization.

Assured's expertly managed solutions not only safeguard your data but also provide peace of mind by ensuring seamless access and recovery with genuine 24/7/365 support.

Protect your Data

Assured's managed services protect and secure your backup data in an immutable format, whether on site, off site, or in the cloud.

Detect Anomalies

Utilizing Machine Learning and AI, Assured identifies anomalies, significant data changes, or suspicious activity within your backup environment.

Recover Operations

Recover from ransomware and other cyberattacks, on-premises or in the cloud, from your immutable backups with near-zero RPOs & RTOs.

Comprehensive Managed Data Protection

Managed Backup

Backup, archive, and recover data on-premises or in your cloud environment.

Off-Site Replication

Replicate critical data to a secure, off-site location to keep operations running.

Disaster Recovery

Recover all your critical IT systems in minutes and hours, not days or weeks.

Cyber Resiliency

Monitor business critical data to prevent data loss and cyberattacks.

Assured's Solutions

Managed Backup

Assured's Backup as a Service is an enterprise-grade backup, recovery, and archive solution, purpose-built to protect organizations of all sizes across single or multiple locations in private, public, and cloud environments.

Assured's solution includes all hardware, software and 24/7/365 support, tailored to meet your technical and commercial requirements.

Disaster Recovery

Disaster Recovery as a Service ensures near-zero recovery times in the event of a significant IT failure. Leverage Assured's DR platform and remove the need for a secondary data center.

Assured's RecoverView platform enables orchestration and automation of recovery testing and live invocation. This includes a fully-documented audit and compliance report.

Off-Site Replication

Replication as a Service provides an up-to-date copy of your backup data in a secure, air-gapped location. Choose one of Assured's off-site facilities or an alternative location.

In the event of production data loss, this gives you the capability to recover quickly from any point in time, to your chosen location.

Cyber Resiliency

Cyber Resiliency as a Service identifies and alerts you to security breaches by automatically monitoring backup data for known threats to discover suspicious activity, ransomware, and cyberattacks.

Detect early warning signals of attackers in your environment and accelerate recovery to a last known good state.

Assured offers a flexible, consumption-based model to grow with your business, making data protection cost-effective and scalable. Their purpose-built software provides industry-leading monitoring and reporting capabilities to provide actionable insights into your data protection strategy. Their global data centers ensure data sovereignty, meeting your organization's compliance requirements. A dedicated team is always available to recover your data and minimize disruption in the event of a disaster.

Future Proof for Cloud

Assured's solutions allow you to move to the cloud non-disruptively with cloud-native protection.

Flexible Pricing

Assured offers a Capacity or Consumption model, which allows for a set price or a pay-per-use option.

Fully-Managed Service

Assured provides automated reporting, backup administration, and comprehensive technical support.
